Engl. and Scotl. Unit: by the Na. of Great-Bri. May 1, 1707.

King GEORGE is safely plac'd upon His Throne,
And with his Parliament agree as One :
There may both Peace and Unity long Reign,
In Loyal Hearts, and always there remain ;
Free from Dissension, Feuds, and Evil Actions,
Plots and Conspiracies, and Knavish Factions.

Observations.

As formable as the last Months Configurations was, these this Month are as considerable, and Variety of them; here is some for War and some for Peace; some shews Plots and evil Contrivances to be now a hatching; and some are of so healing a Nature as to salve up all Breaches, and create a right Understanding between all Parties. The Square Aspect (at the beginning of the Month) of Saturn and Mars, is a very malicious one, and will shew its Effects, and that the more forceably it being back'd with the Square of Jupiter and Mars, the Opposition of ♀ and ♂, and the Opposition of ♄ and ♀, perhaps some Religious Quarrel.

Observations.

The Actions of this Month are carried on with great Judgment and Prudence, and many Controversies of great Concernment are near a Conclusion. Much News arrives from *Sicily, Italy, Rome, Spain, Hungary*, and divers other Places, about some religious Disputes which are there carried on with some Warmth. Many Reports spread Abroad, as various as uncertain for the Minds of Men are too much averse to their own Happiness. Some Male-contented Spirits about this time too busie to foment ambiguous and false Reports, which may be of very ill Consequence.

Such Men in Justice should inherit,

The Halter to reward

8 By sad Example here we see,
 Cities may waste as well
 as we.

This is likely to be a
 Month of Action, many
 Reports spread Abroad,
 and divers scandalous Pam-

 by dissatisfied Persons, to
 the great Abuse of Go-

 Actions of Europe, in ge-

COLEY'S *Astrological Observations*,
The Explanation and Use of the following Table
the Pleiades and Fixed Stars, &c.

THE Table of the *Pleiades*, or *Seven Stars*, contains Columns, the first towards the Right Hand expresses every fifth day of each Month, as 1, 6, 11, 16, 21, 26: The second shews their Rising in hours and minutes: The third their Southings: The fourth their Setting, as is plain by their Titles. Now observe, the Letter (a) denotes Afternoon (b) before Noon, or Morning. And so likewise in the 5th and 7 Columns the same; as also the 8, 9 and 10th, is continued the same, as is plain to the meanest Capacity.

E X A M P L E.

Suppose I desire to know the Rising, Southings and Setting of the *Pleiades* or *Seven Stars*: On *January 21*. I find in the Table they rise 16 min. past 10 before Noon, as (b) denotes, South 32 min. past 6 Afternoon, as (a) denotes. They set at 48 min. past 2 morning signified by (m) in the 5th Column. And so against the 26th of *August* they rise 16 min. past 9 after Noon, South 45 min. past 5 Morn. and Set 2 Afternoon, &c.

In the Second Table of the *Fixed Stars*, there are Columns, 1. The Names of the Stars. 2. Their Rising. 3. Their Southings. 4. Their setting either before or after the Pleiades. 5. Their Latitude. 6. Their Magnitude. 7. Their Nature as their Title directs. In the Columns of Rising, Southings and Setting, is expressed how many hours they Rise, South and Set, either before or after the *Seven Stars*, as the Letter (a) and (b) denotes.

E X A M P L E.

The *Pleiades* or *Seven Stars*, South the 21st of *January* 32 min. past 6 at Night. And in the second Table, I find *Syrus*, or the *Great Dog* South 3 hours 3 min. after the Pleiades, which added to 6 hours 32 min. the Southings of the *Pleiades* at that time, it makes 9 hours 35 min. or 35 min. past 9 at Night, at which time the *Great Dog* is South within 30 min. South Latitude. He is a *Star* of the 1st Magnitude, and held by Authors to be of the Nature of *Jupiter* and *Mars*; understand the same of the rest.

Of the Eclipses this Year.

Which are but two in Number, and they both of the Sun, and both Invisible, in respect to us the British Isles, the first is on *Thursday* 23d Day of *May*, at four in the Morning; not to be seen in England, by reason of the Moon's South Latitude. Second is on *November* the 16 Day, at 9 at Night and before Invisible; The first of these happens in *Gemini*, the last in *Sagittarius* the opposite Sign: These Eclipses creates some differences amongst Princes in matters of Religion, and great dissention amongst Priests, inveterate hatred Seditions, and a contempt of the Laws of both God and Man is to be feared: *Dat Deus immitti cornua curta*

Near the latter end of *December* 1722. was a very remarkable Conjunction of the three Superiour Planets, *Saturn*, *Jupiter*, and *Mars*, in *Sagittarius* a Sign of the *Fiery Triplicity*, for whose effects this and some succeeding Years are Indicated, therefore I shall give my Readers a brief account of the Nature and Signification thereof, and what People is to be the greatest Sufferers thereby and upon what account, (and hope that some more able and Judicious Pen will present the World with a more large and particular account thereof, there having never been a more inviting subject) it hath been Customary amongst very good Astrologers to give Judgment from a Scheme of the Heavens Erected at the time of the (as they suppose) True Conjunction which Custom I presume is very erroneous, that it is impossible to gain the exact time of the Conjunction of *Saturn* and *Jupiter*, from the best Tables yet (or it's to be thought ever will be) Publish'd: I am certain the very best Tables ever yet exhibited to publick View differ some Minutes in the Places of the Superiour Planets, *Saturn* and *Jupiter*, (whose Motions are so disturbed by their Gravitation towards each

other as has been lately discovered), and a very few Minutes error in their Motions will cause some Hours difference in the time of their true Conjunction; therefore I leave that uncertain Curiosity, and present you with the Scheme of the Heavens for the time of the New-Moon whether Pre. or Postventional of the Conjunction it self cannot certainly say, some Tables making the Conjunction of *Saturn* and *Jupiter* sooner, the other Tables later, however this being the nearest Lutation to the Conjunction self, I think it proper to rely upon it in giving Judgment.

the particular Fortitudes and Debilities of the Planets, according to their Situation and Places in the Figure, whereby we may know which of them is strongest and which weakest, and accordingly pronounce judgment, good or bad the Rule enjoyns; Hence, *Saturn* hath Fortitudes 15, *Jupiter* hath Fortitudes 9, *Mars* hath Fortitudes 5, *Sol* hath Debilities 1, *Venus* hath Debilities 4, *Mercury* hath Fortitudes 8, *Luna* hath Fortitudes 2. By which it appeareth, that old surly Gentleman, *Saturn* is Almutter, or chief Ruler of this notable Conjunction, *Jupiter* is next, *Mars*, *Mercury* and the *Moon*, are all of them Strong and Potent but *Venus*, very weak and unfortunate, as being both of them out of all their Essential Dignities; thus much considered, I shall now proceed to the Judiciary Part in order to which as I before Observ'd that these notable Conjunctions of *Saturn*, *Jupiter*, and *Mars*, are Celebrated in *Paracelsus* a Bycorporeal Sign, and the first in Order of the Fiery Triplicity, and hath Signification in Matters of State and Religion, the Order which these three Superiour Planets hold at the time of their Conjunction, is well worthy noting, which for certain is all one with that, which the Planets themselves hold in Heaven; as *Saturn* is *Superius altissimus*, the highest of all the Planets, so is his North Latitude greatest, viz. 1 gr. 3 min. *Jupiter* next, having 22 Minutes North Latitude; and *Mars* lowest of the three as having 22 Min. Meridional, or South Latitude so likewise hath *Saturn* the greatest Number of Fortitudes, *Jupiter* next, and *Mars* the fewest of all the three Superiours, yet is *Mars* in himself very Strong and Powerful. The *Sun*, that Glorious Lamp of Heaven, and Light of the Planetary World, hath also observ'd a peculiar Order of wonderful Harmony, in transiting their Body's, as first coming to the Conjunction of *Mars*, who Preambulates his Orb next to his own, then to *Jupiter*, and last of all to *Saturn* the most remote; the same admirable Order was also Observed by *Mercury* and *Luna*, the two Cœlestial Messengers; and thus are all the Motions and Passions of the Heavenly Intelligences, celebrated with a special Prerogative in Respect of us, which when I consider how exactly these dependances follow one another, I cannot think that God hath Observed this Streight familiarity in Vain, but

ask my Readers Pardon for this short Digression, and
 now come more close to the matter design'd; then
 no' this Conjunction be made in the House of *Jupiter*, yet
Jupiter Suffered himself to be overcome by the ill
 will of Old *Saturn*, and is also betrayed in his own
 house by his implacable Enemy *Mars*, therefore may we
 expect deceitful Sordid and pernicious doings in the Courts
 of Kings and Princes, wholesome Laws Undermined and
 overturned, and a general Change in those Places, Subject to
 the Sign *Sagittarius*; as is *Spain*, *Hungary*, *Sclavonia*, *Ara-*
gon the Happy, &c. *Saturn* bearing Rule in this Conjuncti-
 on, his signification is chiefly to be consider'd. Know then
 (with the Famous Master *Lilly*) that *Saturn* bearing Rule
 in the Body of Man, generally long and tedious
 infirmities, as Consumptions, Defluxions of Rheume, decay
 of the Hypostatical Principles (by which the whole Man is
 naturally Preserv'd;) Quartane Agues, &c. Banishment,
 Poverty, Misery, vain Fears and Mortality to happen to
 many, especially Men of Years. In the World in
 general he denotes a Scarcity of Cattle, especially such as
 are most necessary for the Food of Man; as also of Corn,
 and other Provision, by which a Dearth and Famine is to be
 expect'd; in the Air he causeth great Corruption by his excess
 of Cold, the Air is Dark, Cloudy, much Snow or Rain,
 and many times great Frosts; in the Sea he prenotes many
 shipwracks by bitter Storms and Tempests, difficult and
 dangerous Voyages, Inundations of Waters by breaking of
 their Banks or Bounds, generally there is a scarcity of all
 things, so that many perish by Famine, &c. Fruits are
 destroyed by the multitude of Caterpillars, Grass and Hay
 are great Floods, Beasts by the untimely getting in of Pro-
 visions, and the corruption of the Food they eat; there
 happens also much Rancour and Malice among Men, stiff
 law-suits do rage and continue among the Vulgar and
 Country People, and these are the Evils portended by *Sa-*
turn. *Mars* also having great share of Dominion in the
 foregoing Figure; as having five Testimonies of Strength
 and being Lord of the Ascendant, and having Dignities in
 the Place of the *Sun* and *Moon*; (viz. a Decanate.) there-
 fore will he also evidently manifest his Influences according
 to the following Lines of the Ingenious *Anton* in Satyr 5.

Thus much for the Signification of *Saturn* and *Mars* in this Conjunction and I shall now give you the Signification of ♄ in Conjunction with *Saturn* and *Mars*; in the Fiery Trigion; hear what *Cardan* saith: *Cum videris Conjunctionem vel oppositionem Superiorum in Triplicitate ignea vel aerea, non festines iudicium, nec idem tradas in rebus parvis*; when thou seest a Conjunction or Opposition of the Superiour Planets in the Fiery or Airy Triplicity, be not over hasty to give Judgment, nor let it be of small Matters, for the Actions of these are præminent above the other Triplicities; and here we have all the three Superiour Planets in the same degree of *Sagittarius*, which as *Albumazer* (Tract. 1. Differ. 2.) saith, is the strongest Signs of the Fiery Triplicity: Hear also what *Escuidado* (in his *Sum. Astrolog.* Fol. 16. Chap. 5.) saith, *Cum conjunction fuerint omnes tres in uno termino vel facit, & aspexerit eum Sol, significat hoc destructionem seclorum & regnorum eorum mutationem, nec non & res maximas secundum quantitatem fortitudinis eorum & secundum eum quum vincit in signis eorum*; & hoc est maxima conjunctio eorum quia significat prophetas; when it so happens that all those 3 Planets are conjoynd in one Term or Face, and the Sun beholds them, they signify the destruction of Sects, and Schismatical Opinions, the Mutation of Kingdoms, their Laws and Customs, and the greatness of those Matters from the Quantity of their Fortitudes, and of that Planet that overcometh, or hath most Dominion in the Sign of their Conjunction, and such a like Conjunction is said to be greatest because it hath signification of Prophets, viz. their rise and appearance: *Ramesey*, Lib. 4. Chap. 12. saith, that when these two highest Planets are in Conjunction in the fiery Trygon, many Commotions, Wars, Seditions, Troubles, Subversions of Monarchies, &c. Follow, and if *Saturn* be Stronger than *Jupiter*, it will be very Terrible: And

Wing saith, if *Saturn* shall claim principal Dominion in
 place of the Conjunction, and be elevated above *Jupiter*
 respect of Latitude, (as here he is) it signifies many Dis-
 es and much Evil in general: Let *London* beware then,
 if the single transite of h through T , and the Con-
 junction of *Saturn* and *Jupiter* only doth such Mischiefs,
 at much more may be expected when *Mars* is also con-
 d with them: What I shall observe from the Figure,
 that the Regall Sign *Leo* Culminates, (and nearly the
 degree of that Martial fixt Star *Regulus*,) the *Sun*, Lord
 reof is cadent and Weak in the third House, the *Moon*
 in the third in Opposition to his own House, and *Venus*
 in the third House, Retrograde and Weak, from which
 y be expected Strife, Contention, and Discord amongst
 etheren and Kindred as well as) Neighbouring Nations:
 e three Superiours are in Conjunction in the second
 use, and in the House of *Jupiter*, but terms of *Saturn*,
 ch greatly diminisheth the Fame and Substance of Kings
 Prelates, and exposes the common People to Poverty
 Want; what is farther to be Noted is, that all the
 nets are under the Earth, which shews, that the Mate-
 Signification of this Conjunction, will lye obscure for
 Time, and not break out until the latter part of the

 be hastened by the Conjunction's being Oriental of the

COLEY's *Astrological Observations*, 1722,

The { Midhaven 28 Degrees, 00 Minutes of ☊ }
 { Ascendant 2 Degrees, 10 Minutes of ♌ }

The *Moon* is in the 23 Degrees of *Gemini*, and hath lately departed from the Opposition of *Saturn*, *Jupiter*, *Mars*, *Mercury*, and the Trine of *Venus*, and is now hastening to the Opposition of *Sol*; The Planets are all under the Earth except the *Moon*, who is in the Ninth House, which signifies that Matters are yet carried on with great Secrecy. *Saturn* and *Jupiter* are with the ☊ in the third House, which signifies the fall of Great and Noble Men, but the rise of Ignoble and Base Fellows; *Mars* and *Mercury* are in Conjunction in the 2d House, and in the Sign *Sagittarius*, which Cautions us to beware of the Councils, and advice of Priests and pretended Religious Patriots, whose design is to create Feuds and Discensions.

Of the Spring Quarter : Or, Sol in Aries

THIS Quarter takes Beginning *March* the 10th, at 3 Min. past 3 in the Morning, when 00 Deg. 10 Min. of *Sagittarius* is on the *Medium Cœli*, and 26 Deg. 57 Min. on the Cusp of the Ascendant, the *Moon* defluxes from the Opposition of *Mercury*, and strongly applies to the Quadrant of *Saturn*, and *Saturn* who is Lord of the Ascendant in the 12th House, and in exact Square to the *Sun*, which denotes Men shall sustain much Sorrow, Losses and Crosses, and great damage by Storms of Wind and Rain, and many great and grievous Infirmities in *Macedonia* and other Places subject to the Sign *Capricorn*; *Jupiter* the Significator of *Spain*, in the 12th House with *Saturn*, shews Sickly Diseases, Sorrow, Losses, Crosses, and a Thousand other Calamities to befall that and some other Places under the Sign *Sagittaries*; whereas *Mars* the Significator of *England* is in the Ascendant, and in Conjunction with the benevolent Planet *Venus*, which Promises Health, Joy and Prosperity to *England*. *Sweden* about this Time, is busied sending abroad Ambassadors, and treating with Neighbours and Allies.

of the Summer Quarter : Or, Sol in Cancer.

WHICH this Year takes beginning on *June* the 11th Day at 57 Minutes past 3 in the Morning, at which time the 27th Degree of *Aquarius* Culminates, and the second Degree of *Cancer* Ascends, the *Moon* is in *Aquarius*, and in the 9th House applying to the Square of *Venus*, the *Sun* upon the Cusp of the Ascendant, and in Opposition to *Mercury* and *Jupiter*, *Mars* is Almuton of the Figure in the 10th House, the House of Friendship, and in *Aries*, his Domal Dignities; Δ to h , and in $\ast$ to the *Moon*, which signifies great Happiness to the *English* Nation, Joy, Content, Comfort, Friends, and the ending of Wars.

of the Autumnal Quarter : Or, Sol in Libra.

WHICH this Year begins upon *September* 12th Day, at 18 Min. past 5 in the Afternoon, at which time there is nearly the Degree of the last great Conjunction upon the Angle of Honour, and 6 Degrees of *Pisces* on the Ascendant, the *Sun* is in the 7th House in Square to *Saturn* and *Jupiter*, *Saturn* is near the Cusp of the 10th in Opposition to *Mars*. We now severely feel the Effects of the great Conjunction, Pray God keep *London* from Contagious Distempers, and Intestine Broyles.

The

The Method every one ought to Observe in enquires of an Astrologer, the better to receive true and faithful Responses from the Mouth of one Religious and Learned Astrology.

WHEN a Querent intends to take an Artist's Judgment on Things past, present, and to come, he should first with a Devout Spirit Pray unto the Lord, (from whom proceeds the Success of every lawful Enterprize) that he would grant him the knowledge of those Things, of the Truth of which he would be resolved: And then let him apply himself to the Astrologer with a serious intent, being satisfied in some certain and particular doubt, and this not on trifling Occasions, or light sudden Motions, much less in matters Base and Unlawful, as many ignorant People use to do; but in matters of honest Importance, and such as have possessed and disturbed his Mind for the space of a Day and Night or longer; (unless in sudden accidents which admit not of Delay.) Those that take a Sober Course, shall find the Truth in what they enquire after, but whosoever do otherwise, deceive both themselves and the Artist; for a foolish Querent may cause a Respondent to err, which brings a Scandal upon Astrology amongst inconsiderate People; when as the Astrologer is blameable, but the Ignorant Silly Querent.

But I'm confin'd my Limits bid me stay
my Pen, and to the Press send Post away;
As for the Error's whatsoever they be,
pardon them; then you'll deal Candidly;
For all Men Write according to their Skill,
and so do I, and that I hope's no Ill,

their nothing wanting is I hope in this,
to please the honest meaning Sort, that is
my chief design; which if I miss it here,
I'll try what may be done another Year.

so Exact, as not to be distinguished from Natural; they
are not to be taken out at Night as is by some falsely suggest-
ed; but may be worn Years together, yet are they so fitted,
that they may be taken out and put in by the Person
that Wears them at pleasure, and are an Ornament to the
Mouth, and greatly helpful to the Speech, Also Teeth
cleaned and drawn by *John Watts* and *Samuel Rutter* Op-
